

Mróz Krzysztof // 514-185-121 // private@mrozo.pl // mrozo.pl

Experience

- 2019 III - 2020 XII - **Embedded Developer** at **R.S.X.** - creating BLE based communication protocol, lots of device drivers, embedded GUI widgets.
- 2016 VII - 2019 II - **Python Developer** at **ADVA Optical Networking** - developing backend in Tornado, libraries and doing research for other teams to speed up development and testing.
- 2014 XII - 2015 XII - **UEFI BIOS Developer** at **Intel** - developing own driver for Intel ME which was related to data security.
- Other side jobs/one offs: **Technician** at **events and concerts** - setting up, taking care of multimedia hardware (including telebim), few small **web pages**

Education

- 2010 - 2014 - **Bachelor of Electronics and Telecommunication** at WETI PG

Skills

- mid level - **C programming, Python, make, bash**
- junior/rusty level - **basic Linux administration**, social media marketing, **KiCad**, PHP, MySQL
- Soft skills
 - **ability to manage** and **organize** short project-oriented small (below 15 people) teams - eg. Sierpień Opensource was a 2 month, seventeen person project managed by myself,
 - naturally **doer guy** with passion to do interesting projects that thrives in **"better ask for forgiveness than for permission"** kind of environments
 - I am **loyal teamworker** - when problems appear, I think the first solution should be discuss about it inside my team and try to resolve it without managers intervention

Other

- Long time active member of **Hackerspace Pomorze** and currently a **Board Member**.
- Created dozens of workshops, presentations, even hackathon at the Hackerspace.
- I am **Linux guy**, in love with UNIX philosophy
- Interested in creating whole solutions - starting from electronics, through embedded software all the way up to system/PC/cloud integration.
- I've been a scout, ice hockey player, rugby player, cat lover.
